PROFESSIONAL SUMMARY

A full-stack engineer who ships production web and mobile products with React, React Native, TypeScript, and Node.js. Core contributor to a flagship enterprise customer app serving millions of users — delivering features end-to-end and owning cross-cutting concerns like WebView infrastructure, third-party SDKs, reliability, and accessibility. Over 4+ years I've shipped enterprise apps, internal tools, and cloud infrastructure.

PROFESSIONAL EXPERIENCE

Senior Applications Developer

October 2024 - Present

TELUS Digital Solutions

- Core engineer on TELUS's flagship customer-facing React Native app; deliver features across billing, notifications, navigation, and platform infrastructure.
- Led the design and delivery of a new in-app customer experience end-to-end — from feature detection logic to composed UI — shipped dark behind Firebase Remote Config flags with a full regression test suite for zero-risk rollout.
- Owned cross-cutting platform concerns: the shared WebView layer, Salesforce Marketing Cloud SDK integration in an Expo app, Dynatrace error observability, and WCAG accessibility improvements across billing flows.

Fullstack Engineer

Sept 2024 - October 2024

Hidden Mountain Data

- As a key contractor on an LLM project, rapidly developed and delivered a full-stack internal tool using Vue.js and NestJS within a tight deadline.
- Engineered the backend system, including the database schema with Prisma and PostgreSQL, enabling efficient data processing for the language model.

Software Engineer

May 2023 - Jun 2024

Holland Orchids

- Led the full lifecycle of a new internal software suite, from initial UI/UX prototypes in Figma to full-stack development and deployment, which replaced an outdated legacy tool.
- Improved the stability and performance of existing React legacy systems and managed their on-premises server infrastructure.

Web Dev

March 2021 - May 2023

Adslivemedia Corp.

- Developed and deployed multiple full-stack client websites using React, Vue, and Node.js.
- Managed all aspects of cloud infrastructure on AWS, including service deployment, monitoring, and administration.
- Pioneered the company's Web Augmented Reality offerings by building interactive experiences with A-Frame and Three.js, leading to increased client engagement.

EDUCATION

Universidad Rafael Landivar

2016 - 2023

Bachelor of Engineering in Computers and Systems

SKILLS & PROFICIENCIES

Key Technologies: Javascript, Typescript, React, React Native, Node, Nest, Express, Postgres.

Mobile Engineering: React Native & Expo, native module/SDK integration, and Dynatrace observability.

Cloud Platforms: Proficient in AWS for service deployment and monitoring.

Soft Skills: Problem Solving, Quick Learner, Time Management, Communication.

Software Security: Knowledge of best practices in security for software development.

Web Development: Responsive and mobile-first web design.

Data: Data analysis and visualization.
